If you currently use an Apple Mac, you cannot be happy about the fact that Adobe's desktop CS applications for photos, video, and web are not supported, and because of a strong commitment to productivity, no Photoshop for iOS (or Mac yet). This is not because Photoshop does not make money—it is a highly profitable consumer product—but that designing, editing, and retouching are art in and of themselves, and it matters a lot to me that my favorite applications are in the same place they were when I was a kid (in the 1980s). The iPad Pro makes it possible to edit photos, videos, and other multimedia files in your favorite apps on your desk, bed, or coffee table. You are no longer tied to a desk. You don't have to rotate a screen — you simply bend over. You don't need to hook up cables. You don't even have to do much typing. You use your fingers. Adobe's apps have traditionally been much better with their respective operating systems: iPhoto and iMovie on the Mac, PaintShop Pro in Windows, and Lightroom mobile app in iOS. Even Adobe's web apps have been great. But with the latest version of Photoshop, I've found that it's no match for the latest iOS apps on the iPad, and many of its web apps have simply abandoned the Mac portion of their platform. In this case, the Mac and iOS have simply merged, resulting in the super-user-friendly Photoshop Sketch app, with a massive feature set, and no need for a Mac. Pantone has a reputation for consistently developing a broad set of colors that are good for just about every use. Unfortunately, Adobe is falling behind in this innovation. With the release of the latest version of its Photoshop app for the iPad, a new feature called Tritonal, Adobe has added yet another digital color science language that doesn't include any colors that are particularly useful in graphic design. The same color guides and buttons as Photoshop CC exist in Photoshop Web Preview, so the software remains functional, it just doesn't include the new and very popular Pantone Guide that covers 2000 new colors in the Pantone collection.
